

BDAT04 — PRELIMINARY ASSESSMENT · TEST II PRACTICAL DEMONSTRATION

Botika Maligaya dataset · 45 points · 120 minutes · draw ONE task from each band

One task per sheet. Write your EVIDENCE and DECISION on this sheet and hand it in.

Name: Alcantara, Angus Jullian G. Drawn at: 11:02am Finished: 11:25am

BAND A · TASK A1 · 8 POINTS

A single operation with one correct outcome

What did you just load?

Load the main sales file. Report the number of rows, the number of columns, and the data type Power Query has assigned to QuantityDispensed. In one sentence, say why that type is a problem for a fact table.

EVIDENCE: *(the counted result, visible on screen)*

The number of rows for the Sales is 6,024 rows. The number of columns is 9 columns, the data type Power Query assigned to QuantityDispensed is Whole Numbers. I used group by in the BranchID and counted the values.

DECISION: *(written, in full sentences)*

It was in whole numbers already and the data type and I try to see it in the text so it has thousands and once I change it again to whole numbers it remove the commas in it.

Applied steps renamed? YES / NO

Query name: Change the data type for QuantityDispensed to Whole numbers

Name: _____ Drawn at: 11:25am Finished: 11:32am

BAND A · TASK A2 · 8 POINTS

A single operation with one correct outcome

Prove a column is clean

Load the main sales file. Count the distinct values in PaymentMethod and list each one with its row count. State in one sentence whether this column needs cleaning.

EVIDENCE: *(the counted result, visible on screen)*

HMO: 588 rows, Cash: 3184 rows, Gcash: 1462 rows, Card: 790 rows.

DECISION: *(written, in full sentences)*

_I change the data type to text and for the distinct values there is no need to change as there is no faulty in the values.

Applied steps renamed? Yes Query name: Change type into text

Name: _____ Drawn at: 11:33am Finished: 11:40am

BAND A · TASK A3 · 8 POINTS

A single operation with one correct outcome

A blank that may not be a defect

Load the main sales file. Count how many rows have a blank SeniorCitizenID and express it as a percentage of all rows. State in one sentence whether this is a data quality defect.

EVIDENCE: *(the counted result, visible on screen)*

Nulls row counts is 2505 for the SeniorCitizenID. It is 41.58% of the total percentage of all rows. _____

DECISION: *(written, in full sentences)*

_This is not a data quality defect but rather a business fact of the BotikaMaligaya as this could be a walk in customers. _____

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: 11:41am Finished: 11:48am

BAND B · TASK B1 · 10 POINTS

Two steps where the order matters

The column that will not convert

QuantityDispensed will not convert to a whole number. Repair it so the column sums. Report how many values contained a comma, and the total quantity dispensed across the file.

EVIDENCE: *(the counted result, visible on screen)*

_As I try to check it by changing the type as a text the values that contained a comma total to 17 rows._The total quantity dispensed across the file is 69211. _____

DECISION: *(written, in full sentences)*

_So for me to sum all the quantity dispensed I change the data tpe to whole number and use the sum in the to calculate the total. _____

Applied steps renamed? YES / NO Query name: Calculate the sum

BAND B · TASK B2 · 10 POINTS

Two steps where the order matters

Append, then dedupe

Append the July 2026 sales file to the main sales query, then remove duplicate rows. Report the row count AFTER EACH STEP, and how many rows the deduplication removed.

EVIDENCE: *(the counted result, visible on screen)*

The total row count after the append is 6,544 rows. The row count of the duplicates is 48 rows. After the removal of duplicate TransactionID the total row count is 6,520 rows. So there is a total of 24 Surplus rows.

DECISION: *(written, in full sentences)*

I removed the 23 duplicate transactionID as the 48 rows is the involved in the duplication of a single transaction.

Name: _____ Drawn at: 12:04pm Finished: 12:32pm

BAND B · TASK B3 · 10 POINTS

Two steps where the order matters

More branches than exist

BranchID shows more branches than the branch list contains. Repair the formatting variants — delete nothing — then report how many distinct BranchID values remain and how many rows you repaired.

EVIDENCE: *(the counted result, visible on screen)*

_I seen this ph01 – 11 rows, PH-02 8 rows, PH-05 6 rows, PH03 white space ph04 – 6 rows. There are still 12 list values and I cant combine the duplicate branch ID. The value is a recognizable typo for the branch and fixing it will match in the directory_____

DECISION: *(written, in full sentences)*

_To Fix the obvious for the branch IDs replacing the typos in Sales to match the directory in Branch._____

Applied steps renamed? YES Query name: Removed Hypens in BranchID, Trimmed BranchID

Name: _____ Drawn at: 12:32pm Finished: _____

BAND C · TASK C1 · 12 POINTS

A diagnostic — find it, count it, say what it costs

Products that do not exist

Using a left anti join, find every sales row whose ProductID does not appear in the product list. Count them, name the value or values, and state what happens to those rows in a report broken down by product category.

EVIDENCE: *(the counted result, visible on screen)*

__18 rows are not in the product list. 11 rows for the DRG999 and 7 rows for
DRG404_____

DECISION: *(written, in full sentences)*

__I will retain this 17 sales data and escalate it as I will not invent or guess this data I need to know what it
were_____

Applied steps renamed? NO Query name: Merge ProductID

Name: _____ Drawn at: _____ Finished: _____

BAND C · TASK C2 · 12 POINTS

A diagnostic — find it, count it, say what it costs

Branches that do not exist

Using a left anti join, find every sales row whose BranchID does not appear in the branch list. Count them, then SEPARATE the ones that are a formatting problem from the ones that are genuinely unknown. Report both counts.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND C · TASK C3 · 12 POINTS

A diagnostic — find it, count it, say what it costs

The number that does not reconcile

Compare TotalAmount against QuantityDispensed × UnitPrice. Count the rows that disagree, and SPLIT the disagreement by direction. State which direction has an innocent explanation and which does not.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D1 · 15 POINTS

A judgement — decide, and defend it in writing

The orders that look wrong

After repairing QuantityDispensed, run an outlier test on it. Report the upper fence and how many rows exceed it. Decide what to do with those rows — fix, exclude, escalate or accept — and defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D2 · 15 POINTS

A judgement — decide, and defend it in writing

The negative numbers

QuantityDispensed contains negative values. Count them, state what they represent, and decide: fix, exclude, escalate or accept. Defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D3 · 15 POINTS

A judgement — decide, and defend it in writing

The month with nowhere to land

You have appended the July 2026 sales file. Test the sales dates against the calendar table. Report what you find, and decide what must be done before this model is refreshed again. Defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____
