

BDAT04 — PRELIMINARY ASSESSMENT · TEST II PRACTICAL DEMONSTRATION

Botika Maligaya dataset · 45 points · 120 minutes · draw ONE task from each band

One task per sheet. Write your EVIDENCE and DECISION on this sheet and hand it in.

Name: Lopez, Val Anthonne C Drawn at: 10:51 Finished: 11:04

BAND A · TASK A1 · 8 POINTS

A single operation with one correct outcome

What did you just load?

Load the main sales file. Report the number of rows, the number of columns, and the data type Power Query has assigned to QuantityDispensed. In one sentence, say why that type is a problem for a fact table.

EVIDENCE: *(the counted result, visible on screen)*

There are 6,024 rows in the QuantityDispensed column and there are about 9 columns TransactionID, Date, BranchID, ProductID, QuantityDispensed, UnitPrice, TotalAmount, PaymentMethod, SeniorCitizenID. The QuantityDispensed data type is Int64.

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO =yes, count rows Query name: Sales_____

Name: Lopez, Val Anthonne C Drawn at: 11:05 Finished: 11:19

BAND A · TASK A2 · 8 POINTS

A single operation with one correct outcome

Prove a column is clean

Load the main sales file. Count the distinct values in PaymentMethod and list each one with its row count. State in one sentence whether this column needs cleaning.

EVIDENCE: *(the counted result, visible on screen)*

Card (790 rows), Cash (3,184 rows), Gcash (1,462 rows), HMO (588 rows) having a total of 6,024 transactions.

DECISION: *(written, in full sentences)*

No need to clean this column as I have checked it and it doesn't have any problems or abnormalities.

Applied steps renamed? YES / NO = yes, count rows, filter rows Query name: Sales_____

Name: _____ Drawn at: _____ Finished: _____

BAND A · TASK A3 · 8 POINTS

A single operation with one correct outcome

A blank that may not be a defect

Load the main sales file. Count how many rows have a blank SeniorCitizenID and express it as a percentage of all rows. State in one sentence whether this is a data quality defect.

EVIDENCE: *(the counted result, visible on screen)*

There are 3,519 blank rows in the SeniorCitizenID .

DECISION: *(written, in full sentences)*

For this data this is not much of a concern since it's just senior citizenship.

Applied steps renamed? YES / NO = Yes , filter rows, count rows Query name: Sales_____

Name: _____ Drawn at: _____ Finished: _____

BAND B · TASK B1 · 10 POINTS

Two steps where the order matters

The column that will not convert

QuantityDispensed will not convert to a whole number. Repair it so the column sums. Report how many values contained a comma, and the total quantity dispensed across the file.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND B · TASK B2 · 10 POINTS

Two steps where the order matters

Append, then dedupe

Append the July 2026 sales file to the main sales query, then remove duplicate rows. Report the row count AFTER EACH STEP, and how many rows the deduplication removed.

EVIDENCE: *(the counted result, visible on screen)*

After appending the two files the total no is 6,544 rows and after removing duplicate rows the count is 6,520.

The row count that the deduplication removed is 24 rows.

DECISION: *(written, in full sentences)*

The row count that the deduplication removed is 24 rows.

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND B · TASK B3 · 10 POINTS

Two steps where the order matters

More branches than exist

BranchID shows more branches than the branch list contains. Repair the formatting variants — delete nothing — then report how many distinct BranchID values remain and how many rows you repaired.

EVIDENCE: *(the counted result, visible on screen)*

After appending it showed a total of 14 branches and after filtering it showed 5 more branches after, given that the formatting is different like PH-02, PH-05, ph01.

DECISION: *(written, in full sentences)*

It only showed 9 branches in total after removing and fixing the rows.

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND C · TASK C1 · 12 POINTS

A diagnostic — find it, count it, say what it costs

Products that do not exist

Using a left anti join, find every sales row whose ProductID does not appear in the product list. Count them, name the value or values, and state what happens to those rows in a report broken down by product category.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND C · TASK C2 · 12 POINTS

A diagnostic — find it, count it, say what it costs

Branches that do not exist

Using a left anti join, find every sales row whose BranchID does not appear in the branch list. Count them, then SEPARATE the ones that are a formatting problem from the ones that are genuinely unknown. Report both counts.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND C · TASK C3 · 12 POINTS

A diagnostic — find it, count it, say what it costs

The number that does not reconcile

Compare TotalAmount against QuantityDispensed × UnitPrice. Count the rows that disagree, and SPLIT the disagreement by direction. State which direction has an innocent explanation and which does not.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D1 · 15 POINTS

A judgement — decide, and defend it in writing

The orders that look wrong

After repairing QuantityDispensed, run an outlier test on it. Report the upper fence and how many rows exceed it. Decide what to do with those rows — fix, exclude, escalate or accept — and defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D2 · 15 POINTS

A judgement — decide, and defend it in writing

The negative numbers

QuantityDispensed contains negative values. Count them, state what they represent, and decide: fix, exclude, escalate or accept. Defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

After checking I found 8 orphan rows and 2 distinct values which is -3 and -4 .

DECISION: *(written, in full sentences)*

Fix this data as this is not possible to just ignore for this category such as quantity dispensed because even having after negative count there's still a unit price, product id, transaction id meaning the other data is complete its just this quantity dispense that needs to be fixed.

Applied steps renamed? YES / NO Query name: _____

Name: _____ Drawn at: _____ Finished: _____

BAND D · TASK D3 · 15 POINTS

A judgement — decide, and defend it in writing

The month with nowhere to land

You have appended the July 2026 sales file. Test the sales dates against the calendar table. Report what you find, and decide what must be done before this model is refreshed again. Defend the decision in writing.

EVIDENCE: *(the counted result, visible on screen)*

DECISION: *(written, in full sentences)*

Applied steps renamed? YES / NO Query name: _____
